No. **TEC NO** _____

Health certificate for exporting fishmeal and other aquatic proteins to the People's Republic of China.

1. Origin of the product (country of region) and the competent authority: **PAKISTAN, MARINE FISHERIES DEPARTMENT GOVERNMENT OF PAKISTAN, FISH HARBOUR WEST WHARF, KARACHI-74000 PAKISTAN**
2. Nature of packaging and number of packages _____
3. Net weight: _____
4. Name and address in full of the consignor and consignee:_____
5. Name, address and official registration number of the approved establishment of origin:_____
6. Country and place of dispatch: _____
7. Country and place of destination: _____
8. Means of transport: _____
9. Identification of container / seal number:
10. Health attestation:
    a. The product described above was processed and packed in an approved establishment namely_____, which is supervised by the competent authority i.e., **Marine Fisheries Department, Ministry of Maritime Affairs, Government of Pakistan.** The establishment is also registered by AQSIQ and is in compliance with the national or regional requirements**.** The product is allowed for free sale.

    b. The raw material used to produce fish meal is either aquatic animal caught in the country or region's domestic sea or in the open sea or farming aquatic animals or aquatic animals' by-products from plants manufacturing aquatic product for human consumption. Aquatic animals died abnormally or were killed for disease eradication was not used as raw material. The product does not contain any ingredients of other non-aquatic animal and is not contaminated by any product(s) of animal origin from third countries.

c. The product has been subject to a heat treatment at least *85*℃ for 15 minutes throughout its substances or has been treated with other means which are recognized by AQSIQ to be equivalent.

d. Effective measure has been taken to avoid contamination both during and post the production process.

e. The product does not contain any hazardous substances which pose a risk to public or animal health and is in compliance with the safety and hygiene standards of the standard fish meal. The product is not fit for human consumption.

f. The products have been subject to tests by official approved laboratory using PCR or other effective methods with negative results to ruminant ingredients.

g. The competent authority examined a random sample prior to dispatch and confirms the following requirements are fulfilled:

Salmonella:	**Absence in 25 g: n = 5, c = 0, m = 0, M = 0;**
Enterobacteriaceae	**n = 5, c = 2, m = 10, M = 300 in 1 g;**

Where:

n = number of samples to be tested;
m = threshold value for the number of bacteria; the result is considered unsatisfactory if the number of bacteria in all samples does not exceed m;
M = maximum value for the number of bacteria; the result is considered unsatisfactory if the number of bacterial in one or more samples in M or more; and
c = Number of samples the bacterial count of which may be between m and M, the samples still being considered acceptable if the bacterial count of the other samples is m or less.

h. The end product was packaged with new, clean, sealed, impermeable, moisture resistant and not easily broken materials. As for bulk transportation, the containers or other means of transport were thoroughly cleaned and disinfected with a disinfectant approved by the competent authority before use.

i. Labels that are in compliance with relevant standards of the People's Republic of China have been attached to the outside packaging material. Label of Bulk product was sent along with the invoice.
